HYGIENIC CHARACTERISTICS OF THE PRODUCT

Substances, indicators (factors)	Hygienic standards (SanPiN /Sanitary Regulations & Norms /, MDU /Maximum Permissible Level/, PDK /Maximum Allowable Concentration/ etc.)
Water extract odour, water extract taste	not more than 1 point
Migration of harmful substances into the air, mg/m ³	
Formaldehyde	0.003
Styrene	0.002
Methyl alcohol	0.500
Butyl alcohol	0.100
Benzene	0.100
Toluene	0.600
Ethylbenzene	0.020
Working area air control for ethenylbenzene (maximum allowable concentration 30/10 mg/m ³ , class 3 under GOST12.1.007) and (1-methylethynyl)benzene polymer with ethenylbenzene (maximum allowable concentration -/5 mg/m ³ , class 4 under GOST12.1.007), ambient air control for ethenylbenzene (maximum allowable concentration 0.04/0.002 mg/m ³ , class 2 under GOST12.1.007).	
Toxicological characteristics: low-toxic and low-hazardous substance, 4 th class of hazard under GOST 12.1.007-76, does not irritate skin and mucosae, allergy-safe.	

Field of application:

Manufacture of disposable dishware, foodstuff packaging, refrigerator components and other items.

Required conditions of use, storage and transport, and safety measures:

In compliance with the requirements of TU 2214-001-11175949-2003

Label information:

Product, producer, producer's address, purpose, main properties, use regulations, TU (technical conditions)

Hologram image

The conclusion is valid until 10.08.2011
